## Professional Profile

---

Software engineer (frontend) with two years of experience specialised in **TypeScript** and **Javascript**. I love exploring and enabling new technologies. I thrive in fast-moving environments where experimentation and collaboration across teams are key.

I quickly adopt new concepts and actively collaborate with teammates in order to boost our understanding of these technologies. I am known for clear communication, ownership, and bringing positive energy to teams. Experienced in international and remote collaboration across countries.

**Primary stack:** Typescript, Javascript, Angular, Vue.js, Django, SQL (mySQL)

## Work History

---

12/2024 - present    **Frontend software engineer for digital mortgages solution**  
**Oper Credits - opercredits.com | Antwerp, Belgium (remote)**  
End-to-end digital mortgage app for banks and borrowers  
**Stack:** Typescript, Angular, SCSS, Python, Django

- Refactored and maintained the frontend codebase, improving practices and reducing technical debt
- Recognized by colleagues for clarity in communication, collaboration, and positive team spirit
- Worked in Scrum with three weeks sprints and cross-functional collaboration and Kanban board for feature tracking
- Integrated a third-party data provider and implemented a data flow to switch between external and user-entered data
- Contributed to backend tasks such as API integration and small feature support in a startup environment

01/2024 - 11/2024    **Frontend software engineer for online comic editor**  
**Comixplain - comixplain.cc | St Pölten, Austria**  
Online comic editor used for a research project  
**Stack:** Javascript, Vue, Nuxt, SCSS

- Structured and initiated the front-end architecture for a research-driven product
- Acted as frontend lead, supporting team members in understanding new concepts and design decisions
- Worked in Scrum with three weeks sprints

08/2023 - 11/2024 **Co-founder of COMMUTE**

**COMMUTE | Vienna, Austria**

Mobile app to facilitate urban carpooling

**Stack:** React-native, Javascript, Firebase

- Developed a mobile app for urban carpooling using React Native and JavaScript, managing the full front-end and back-end development.
- Designed and implemented a Firebase database to handle user data, ride matching, and real-time updates.
- Participated in incubator program, receiving mentorship and pitching progress updates to investors and stakeholders.

11/2012 - 02/2017 **Project Manager (2015 - 2017), Stock Manager (2012 - 2015)**

**Nespresso | Grenoble, France**

Lead several projects affecting the supply chain of Nespresso

- Led the transition of an after-sales service from a purely online platform to a combined online and in-store experience, including designing the in-shop process and training store employees.
- I created a Minimum Viable Product of an application (Excel, VBA) to compare data from our main software, to data collected using a scanning tool. This resulted in reducing inventory time by more than 50% and reduced the stock error by 15%.

## Education

---

2021 - 2024 **Bachelor of Creative Computing**

USTP – University of Applied Sciences St. Pölten  
St Pölten, Austria

2010 - 2012 **Technical Degree in Management**

IUT 2 - Pierre Mendès France  
Grenoble, France

## Additional Skills and Interests

---

### Languages

- English (C2), French (Mother tongue), German (A1 - intensive class ongoing to A2)

### Interests

- Climbing enthusiast with a strong passion for outdoor activities
- Physical computing: combining problem-solving and hands-on crafting to build everyday objects to make my everyday life easier
  - Bluetooth receiver for an old sound system
  - Smart scale to remind a focused engineer to drink water
