Professional Profile

Frontend developer with two years of experience specialised in **TypeScript**. I worked at a startup, where I quickly grew into my engineer role and owned features end-to-end, from business requirements through solution design to delivery.

In my last position I was valued for my technical skills, my capacity to learn, having a clear communication, and sense of responsibility working in a team. I am sure I will be an asset for your team, helping to build high-performance and meaningful products.

Primary stack: Typescript, Angular, Vue.js, Django, SQL (mySQL)

Work History

12/2024 - present

Frontend software engineer for digital mortgages solution

Oper Credits - opercredits.com | Antwerp, Belgium (remote)
End-to-end digital mortgage app for banks and borrowers
Stack: Typesctipt, Angular, SCSS, Python, Django

- Refactored and maintained the frontend codebase, improving practices and reducing technical debt
- Implemented new frontend features using TypeScript based on product requirements
- Delivered the full UI redesign, building reusable and consistent components
- Integrated a third-party data provider and implemented a data flow to switch between external and user-entered data
- Contributed to backend tasks such as API integration and small feature support in a startup environment

01/2024 - 11/2024

Frontend developer for online comic editor

Comixplain - comixplain.cc | St Polten, Austria
Online comic editor used for a research project
Stack: Javascript, Vue, Nuxt, SCSS

- Initiated and structured the front-end codebase for Comixcraft, an online comic editor
- Took ownership of feature development from concept to iteration
- Gathered user feedback through testing sessions and translated insights into product improvements

Won University of Applied Sciences St. Pölten (USTP) project of the year

08/2023 - 11/2024	**Co-founder of *COMMUTE***

COMMUTE | Vienna, Austria
Mobile app to facilitate urban carpooling
Stack: React-native, Javascript, Firebase

- Developed a mobile app for urban carpooling using React Native and JavaScript, managing the full front-end and back-end development.
- Designed and implemented a Firebase database to handle user data, ride matching, and real-time updates.
- Participated in incubator program, receiving mentorship and pitching progress updates to investors and stakeholders.

11/2012 - 02/2017	**Project Manager (2015/2017), Stock Manager (2012/2015)**

Nespresso | Grenoble, France
Lead several projects affecting the supply chain of Nespresso

- I introduced a new after sale service transitioning to an online platform to online and physical. This included the creation of a training for shop employees and a new physical flow for our outlets
- I created a MVP of an application (Excel, VBA) to compare data from our main software, to data collected using a scanning tool. This resulted in reducing inventory time from more than 50% and reduced the stock error for 15%.

Education

2021 - 2024	**Bachelor of Creative Computing**
	USTP – University of Applied Sciences St. Pölten
	St Pölten, Austria

2010 - 2012	**Technical Degree in Management**
	IUT 2 - Pierre Mendès France
	Grenoble, France
